

## Environmental and Sustainability Policy Statement

The Auckland Motorways purpose is to operate and maintain a connected network for all stakeholder where customers feel informed and are confident that they will get to their destinations comfortably, safely and reliably at all times. Our mission is zero harm to our people, zero harm to our environment and zero harm to our business.

The Auckland Motorways charter sets five key objectives:

- Maximising network efficiency.
- Being a customer and stakeholder driven organisation
- Delivering a positive legacy for future generations
- Delivering enhanced value for money.
- Creating and maintaining a healthy and enthusiastic organisation.

To improve environmental and sustainable management within its business and meet our objectives the AMA will:

- Comply with all environmental legislation, regulations and Government Policy requirements relevant to our business.
- Recognise important and sensitive environmental assets within and adjacent the AMA network and protect and enhance these where possible.
- Use best practice option to avoid adverse effects to the environment, including pollution.
- Continually seek new and innovative ways to use resources more efficiently and operate more sustainably.
- Improve the sustainability of our offices, depots and operation by using and managing resources efficiently.
- Provide our employees with the skills, awareness and leadership to achieve the AMA's environmental and sustainability objectives.
- Continually improve our environmental performance through maintaining, reviewing and implementing our environmental management system.
